2. Cut out the shape of the reindeer and lightly trace around the shape onto the plate with a pencil including the ornaments
3. Using the Soft Fan, three coats of FN-001 White to the reindeer. Paint over the pencil line so it extends past the paper patten when applied.
4. You will work in sections. Use the Soft Fan to apply water to the deer. Place the paper pattern over the moistened area and press down. Press with a paper towel to remove gaps. The paper acts as a masking tool to prevent the next color from seeping onto the deer.
